OBJECTIVE

I am a Full Stack Developer. I have rich experience in web application development using Django. I'm currently learning Django. To work for an organization within the regulations of the organization and flourish my skills and knowledge with the organizational objective.

EDUCATION

- 2023 B.Sc. in CSE, Pabna University of Science and Technology (PUST), Pabna.
- 2015 H.S.C. Examination. Science. Armed Police Battalion Public School and Collage, Bogura.
- 2013 S.S.C. Examination. Science. Kagail Karuna Kanta High School, Gabtali, Bogura.

UNDERGRADUATE THESIS

Title Paddy Diseases Detection and Classification. Supervised by S.M. Hasan Sazzad Iqbal, Associate Professor, Department of CSE, PUST.

This thesis explored different analysis models for paddy disease detection and classification. We proposed a deep convolution neural network transfer learning-based method. This system can detect and classify 9 different paddy diseases and normal paddy plants.

SKILLS

Technical Skills:

- Backend - Django, Django Rest Framework (Python)
- Database - MySQL, SQLite, PostgreSQL
- Frontend - JavaScript, Bootstrap, Tailwind CSS, HTML, CSS
- Language - C, C++, DSA, OOP, Python
- Tools/Others - Git / GitHub, VS Code, CodeBlocks, cPanel sever
- Problem-solving - [CodeForces](#) 88 problem solved [LeetCode](#) 57 problem solved

Soft skills:

Hard working, Teamwork, Responsibility, Management, Leadership, Motivation, Flexibility, Adaptability, Photography, etc.

EXPERIENCE

Full Stack Developer at [Amarsoft Solutions Ltd](#) (June 2024 -Present)

South Paikpara, Mirpur-1. Dhaka-1216

PROJECTS

01. Hospital Management System [Website](#)

This is a hospital management system. Here, employees give online/offline appointments to patients. When the doctor visits, they update the visit fee along with the medicine fee and other fees. They print prescriptions and money receipts. When visited, they will receive an SMS on the patient's number. Admin can control the employee, all the accounts are under the responsibility of the admin, where the doctor's bills, employee salaries, all expenses, and income data are entered.

Features:

- The employee only handles the appointment, prescription, and money receipt part.
- The admin can handle everything, including the account part.
- Every payment is notified to the concerned person or organization through SMS on their mobile number.

using Technology: Django, HTML, CSS, Bootstrap, javascript, mySQL, cpanel, VS code, Github

02. Publication Management System [Website](#)

This is a publication management system. Here, employees distribute books, give various gifts or honorariums to teachers of different colleges on behalf of the publication and enter that data. Along with that, they also enter their own various expenses on their expense page. Admins approve/reject that data. Employees will get access to the upazilas assigned to them. Each employee can see their own history by filtering it on the basis of date, month, or year.

Features:

- Employees can enter their various data.
- Employees will not be able to work outside their assigned upazila.
- As soon as the data is approved, an SMS will be sent to the mobile number of the teacher according to that data.

using Technology: Django, HTML, CSS, Bootstrap, javascript, mySQL, cpanel, VS code, Github

03. Club / Association with Donation System [Live](#)

It is an Association/club with Donation, Exchequer, and Member management. It made for an Association or club management system, a Blood bank system. posts, upcoming events, and notices with its details, can comment on any posts notices posts and upcoming events post.

Features:

- Search blood using many parameter filter.
- Member can donate using SSL Commerz payment method.
- The user can provide their email for the Newsletter.

using Technology: Django, javascript, PostgreSQL, vercel, supabase, Github

04. E-commerce/Market Supervision System [Live](#)

It is a buy and sales center. The user buyer and saller both role play in this system. They can see their buy list history and sale list with their order status, status updates will be sent by email to the buyer. Authority can provide news updates to the collection of emails.

Features:

- User buyer and seller both role play in this system.
- They can use Payment method SSL Commerz.
- The user can provide their email for the Newsletter.
