Full Stack Developer at [Amarsoft Solutions Ltd](#) (June 2024 -Present)
South Paikpara, Mirpur-1. Dhaka-1216

PROJECTS

01. Hospital Management System [Website](#)

This is a hospital management system. Here, employees give online/offline appointments to patients. When the doctor visits, they update the visit fee along with the medicine fee and other fees. They print prescriptions and money receipts. When visited, they will receive an SMS on the patient's number. Admin can control the employee, all the accounts are under the responsibility of the admin, where the doctor's bills, employee salaries, all expenses, and income data are entered.

Features:

- The employee only handles the appointment, prescription, and money receipt part.
- The admin can handle everything, including the account part.
- Every payment is notified to the concerned person or organization through SMS on their mobile number.

using Technology: Django, HTML, CSS, Bootstrap, javascript, mySQL, cpanel, VS code, Github

01. Club / Association with Donation System

It is an Association/club with Donation, Exchequer, and Member management. It made for an Association or club management system, a Blood bank system. posts, upcoming events, and notices with its details, can comment on any posts notices posts and upcoming events post.

Features:

- Search blood using many parameter filter.
- Member can donate using SSL Commerz payment method.
- The user can provide their email for the Newsletter.

using Technology: Django, javascript, PostgreSQL, vercel, supabase, Github

Frontend: [Live](#) [Code](#)
